

SRBA Coordinated Monitoring Meeting  
Meeting Minutes-FY 2008  
April 24, 2008

Time: 3:00 PM

Location:

NETWMD Offices

Hugh Springs, Texas

The meeting was called to order by Mike Buttram of the SRBA. Meeting materials were distributed that included a Region 3 site map, a Region 3 permitted point source map, and the LCRA Web Page for the Region 3 Coordinated monitoring.

The group went through the Basin 3 sites segment by segment. The only changes to the existing schedule were the deletion of color analysis for two sites in Segment 301 and the inclusion of two additional 24-hour studies on Segment 302. These were included because the studies have become desirable during the fall and spring.

A number of issues were discussed that did not result in changes. These included the merits of monitoring Rock Creek and White Oak Creek, two off segment sites. In addition Ms Jennifer Delk brought the group up to date on E coli monitoring and the protocol for use of laboratories for comparative monitoring.

3:30 PM Meeting ajourned
